

**International
Association of
Hydrogeologists**

the world-wide groundwater organisation

OUR MISSION

IAH's mission is to further the understanding, wise use and protection of groundwater resources throughout the world.

OUR VISION

IAH will be the leading international society for the science and practice of hydrogeology and will be a globally recognized information source and facilitator for the transfer of groundwater knowledge. By 2020, we will serve over 5,000 members. We will raise awareness of groundwater issues and work with National and International Agencies to promote the use of groundwater to ensure ready access to safe drinking water. IAH will also promote the protection of aquifers against pollution, the improvement of aquifer storage and the management of groundwater resources to assure the sustainability of groundwater-dependent ecosystems.
