## California's Statewide Airborne Electromagnetic Surveys of Priority Groundwater Basins - Free Zoom Meeting

Get ready for California's online event, where we'll be showing how we are improving our understanding of groundwater with AEM technology. Presentations by California Department of Water Resources Hydrogeologists and Geophysicists. Hosted by IAH-USNC. Sponsored by Ramboll and SkyTEM

The SkyTEM airborne electromagnetic system is suspended approximately 100 feet above the ground surface from a Sinton Helicopter that flies about 50 mile per hours. The output data provide electrical resistivity values for the underlying geology, which translate into texture profiles of sediments comprising aquifer systems. For more information on California's AEM Project visit [DWR-AEM](#)

**Time: Feb 28, 2024 12:00-1:00 PM Pacific Time (US and Canada)**

### Agenda

- Project Background
- Project Overview
- AEM Technology
- Hydrogeologic Applications
- Data Availability
- Next Steps
- Q&A

**Note - you will have to pre-register on Zoom to attend this free event:**

<https://us02web.zoom.us/meeting/register/tZcod-uvpj4sH9exKYC5Z-f1s-P-OvLvDhSx>

Once you register, you'll receive the Zoom meeting login information via email.

Please do not forward the Zoom meeting information you receive after registration - we need to track registration numbers to ensure we have capacity for all those that register. Please do feel free to forward this email with the Zoom link to register for the event.

**Questions: Contact Tim Parker [tkparker@Ramboll.com](mailto:tkparker@Ramboll.com)**
